

Tianyi Chen

The scene has a letter 'N' in it. It is my girlfriend's initial. All three lines of N is of different color. The N was surrounded by a cyan torus which is thin so that it looks like a ring. The ring moves up and down looks like some scanning device in sci-fi movie. There are also two small spheres surrounding the N, they move like a double helix. The N itself also shrinks as the ring goes up and enlarges as the ring goes down.

The color choice is inspired by my girlfriend. The ring was inspired by the game Portal. And the double helix was inspired by DNA structure.
